► THEME // VIDEO GAME

Get ready to level up! The “**Water Rocket**” event is inspired by the world of video games, where every team builds, upgrades, and competes to top the leaderboard. Just like in your favourite game, your creativity and skill will decide how far — and how long — your rocket flies.

Think of your water rocket as your in-game character — the better you build and design it, the higher you score. Earn points for range and time of flight, unlock bonus points for aesthetics, and aim for the high score. Get ready to press start — **because the sky is not the limit!**

GAME BRIEFING

Build. Launch. Top the leaderboard — one water rocket at a time.

GAMEPLAY AT A GLANCE

**BUILD**

Design your rocket like your own game character

**AIM**

Every gram and angle affects range and flight time

**LAUNCH**

Hit start and put your build to the test

**LEVEL UP**

Score points and climb the leaderboard

► EVENT RULES

01	Teams must consist of minimum 2 members and maximum of 3 .
02	Use of Electronic , Metal and Glass items are strictly prohibited.
03	You can also prepare a parachute for increasing your time of flight (<i>not mandatory — you may instead make the nose more aerodynamic</i>).
04	It is recommended to prepare 2 nose cones : one for vertical launch (<i>parachute opens</i>) and one for launch at an angle (<i>for maximum range</i>).
05	Round 1 — Range Test . Objective: achieve maximum range, measured from the launch point to where the rocket touches the ground.
06	Round 2 — Time of Flight Test . The rocket launches at 90° from the ground ; objective is maximum time of flight . Timer starts at launch, stops on ground contact.
07	Round 3 (<i>optional</i>). Teams choosing to compete must decide whether to go for time of flight or range.
08	The Round 3 result becomes the official score for that test (<i>time of flight or range</i>); the previous round's result for that test is discarded.
09	Extra marks for innovation in rocket design and aesthetic launcher design (<i>e.g. launcher/rocket tied to the theme</i>).
10	Teams must use a water rocket equipped with a bike valve for pressurization.
11	Rockets must be filled only with water and pressurized with air .
12	Each team should use their own launcher.
13	The judge's decision is final. Any act of indiscipline may result in disqualification of the team.
14	Each team must follow their time slots strictly.

Pro tip: Rules 05–08 decide how your final score is calculated — read the Points System on the next page before you finalize your build.

► POINTS SYSTEM

Score high. Fly far. Stay in the air.

TIME OF FLIGHT

+2

PTS / SECOND

RANGE

+0.5

PTS / METER

★ BONUS POINTS AWARDED FOR AESTHETICS ★

TRAJECTORY — WHAT EACH TEST MEASURES

TIME OF FLIGHT — measured start to landing

RANGE — launch point to landing point

ROUND 1 • RANGE

Fly **30 m** downrange → $30 \times 0.5 = 15$ pts, plus any aesthetic bonus.

ROUND 2 • TIME OF FLIGHT

Stay airborne for **8 seconds** → $8 \times 2 = 16$ pts, plus any aesthetic bonus.

★ AESTHETICS COUNT TOWARD YOUR FINAL SCORE ★

A THEMED, WELL-BUILT LAUNCHER CAN TIP A CLOSE ROUND

► EVENT GUIDELINES

01	Only water shall be used as the propellant. Soap water, chemicals, or any other substance for propulsion is strictly prohibited .
02	Each team shall consist of a maximum of 3 members . No team may exceed this limit.
03	A list of authorized shops/vendors for purchasing required materials will be provided to all participating teams.
04	Before purchasing any materials, each team must consult their respective mentor and obtain the necessary guidance.
05	If a team cannot reach their mentor, they may approach the Event Coordinator or Co-Coordinator for assistance.
06	Any misbehavior, misconduct, or violation/non-compliance with competition rules may result in the immediate disqualification of the concerned team.
